

FOR IMMEDIATE RELEASE:

Custom Product Turners

Somerset, NJ USA – 14 July 2016 – Murtfeldt GmbH of Dortmund, Germany is a global leader in the manufacturing and machining of their proprietary brands of engineered plastics into diverse product groups. Since 1958, with the development of their unique UHMW-PE, Original Material “S” Green material, Murtfeldt has developed a series of standard products including slide profiles, chain and belt guides, chain tensioners, and now, custom product turners for all packaging, filling and transport system applications.

Murtfeldt can design and manufacture product turners to meet any customers' individual requirements. Whether turning cans, bottles, glasses, cups, boxes or crates of any size, Murtfeldt's application engineering department will design a solution based on your unique requirement.

The exceptional sliding properties of Murtfeldt's machined plastics yield minimal accumulated resistance during conveying. Products can be moved smoothly and quietly due to; low coefficient of friction of Murtfeldt's plastics, precision machining techniques and joint-free designs. Their modular designed product turners also simplify dismantling for cleaning.

Custom product turners are manufactured from the wide range of Murtfeldt's engineered plastics suitable for most environmental and application requirements including:

- Extreme Temperatures
- Food Safety (FDA & EC1935/2004 Approved)
- Bacteria Growth Reduction
- Low Coefficients of Friction
- Various Impact & Tensile Strengths
- Chemical Resistance
- Static Electricity Dissipation

Advantech International, Incorporated of Somerset, NJ is the exclusive representative and distributor in North America. Please contact Advantech for more details.
